DGTEnergy Tokenomics

Overview

Total Supply: 1,000,000,000 DGT (fixed at genesis).
No burn or mint; all tokens issued at launch.
Multichain support: Ethereum, BNB Chain, Polygon, Solana.

Seed Round

11,666,667 DGT allocated.
Price: 0.036 USDT/DGTE.
Target raise: 420,000 USDT.

Progressive Rounds

Step-up price model (+0.5–0.8% per round).
Unsold tokens remain locked in treasury.

Utility

Staking rewards in USDT (performance-linked, discretionary).
Governance participation via Snapshot.
Token-gated dashboards and transparency tools.

Allocation

100% of raised capital deployed into verified energy receivables and operations.
Transparent dashboards ensure full traceability of funds.
